Vice President for Technology-
Enhanced Education, WICHE

Introduction

What is Negotiated Rulemaking?

Negotiated rulemaking, or NegReg, is the Department of Education's process to develop new or updated federal regulations.

- Constituency group representatives are nominated and selected.
- These "negotiators" meet to discuss proposed regulations.
- If the group reaches a consensus, the Department releases the agreed-upon language for public comment.
- If the group does not reach a consensus, the Department writes the rules and releases its proposed language for public comment.
- After the public comment period ends, the Department makes any desired changes to the proposed regulations and releases the final version of the regulations.

State Authorization

State Authorization: Reciprocity

Proposed Language

- Enforcement of State Laws
 - Applicable general purpose State laws (as would be applicable to any business).
 - Applicable state laws related to closure including record retention, teach-out plans or agreements and tuition recovery funds or surety bonds.
 - Permit any state to condition or revoke authorization for violation of general purpose laws and regulations.

Implications

- Institution to comply with types of state laws where the student is located.
 - General purpose laws is not new: Fraud, Misrepresentation etc.
 - Closure laws consistent with the new Certification Procedures regulation but extends regardless of reciprocity.
 - SARA process includes the ability for the any state to condition or revoke authorization if an institution violated general purpose laws or regulations– no new impact.

State Authorization: Reciprocity

Proposed Language

- Complaint processes requirements
 - Compliant information to be communicated to the state where the student is located.
 - Report publicly and annually institutional complaints by type and number of complaints.
 - Allow for the state's discretion to address complaints without first going through the institution's complaint process.

Implications

- Many are similar to SARA policy
 - Currently SPEs share information between the home and host states in order to resolve the complaint.
 - Current SARA Policy provides for reporting but can add type and number.
 - The proposed language is not completely clear about what state can have the final authority over the resolution of the complaint.

State Authorization: Reciprocity

Other Reciprocity Related Proposals

- Reciprocity boards limited to state employees in regulatory jobs.
- More than 500 enrolled students in a state in the two most recently completed award years, the institution must seek individual state authorization in those states.

Implications

- Regional compacts and other expertise removed from board.
- Threshold language is not clear.
 - Process: what activities, whose data, who oversees, & what is the time to obtain state approval.
 - Protections: what about the institution serving more than 500 students in a state with no oversight? Would those students lose protections?

Distance Education

Return to Title IV: Attendance Taking

Proposed Language

- Require taking "attendance" for all distance education courses - meaning finding last academic activity.
- Document student's withdrawal within 14 days of "last date of attendance."

Implications

- Currently, institutions only need to determine the last day of attendance for those students who cease attending a distance class.
- Must determine when the student last engaged in an academic activity.

Distance Education: Virtual Location

Proposed Language

- Create new "virtual location."
- Defined as:
"offers 100 percent of an educational program through distance education or correspondence courses, not withstanding requirements for students to complete on-campus or residential periods of 90 days or less."

Implications

- Student can access closure benefits if institution closes all of its distance programs.
- Allows Department to collect more data on distance education programs.

Distance Education: Asynchronous Clock Hours

Proposed Language

- For institutions using clock hour financial aid -
Disallow synchronous distance education courses.

NOTE: Does not apply to credit hour instruction.

Implications

- Asynchronous distance education clock hour courses would no longer be eligible for Title IV financial aid.
- Regulate against courses purely on modality reasons?

Distance Education: Accreditation

Proposed Language

Thresholds for “substantive change” reviews:

- **First program** offered 50% at a distance. OR
- Institution exceeds **50% of students enrolled** in at least one distance course. OR
- Institution offers at least **50% of its courses** at a distance.

Implications

- Replaces 2021 threshold of program being offered “in whole or in part” at a distance.
- While better, an increasing number of institutions will hit the 50% enrollment threshold.

Books and Resources in Tuition and Fees

Cash Management: Books & Resources in Tuition & Fees (Inclusive/Equitable Access)

Proposed Language

- Institutions could only include instructional materials and supplies in tuition and fees if:
 - The institution "individually discloses the cost," AND
 - The student opts-in, AND
 - The cost of the materials is "at or below competitive market rates."

Implications

- Inclusive access programs as they currently operate at most institutions would be significantly hampered.
